

LESSON 3

FUNDAMENTALS OF WEB PAGE DEVELOPMENT

HTML

OBJECTIVES

Determine the key concepts about the web

Enumerate the general web page development guidelines

List the basic HTML doc structure

INTERNET

- a **worldwide collection of computer networks**
- connects** different individuals and organizations throughout the world for the **exchange of information**

USES OF INTERNET

- Communication Tool
- Source Of Information
- Job Searching
- Online-shopping
- Online-learning

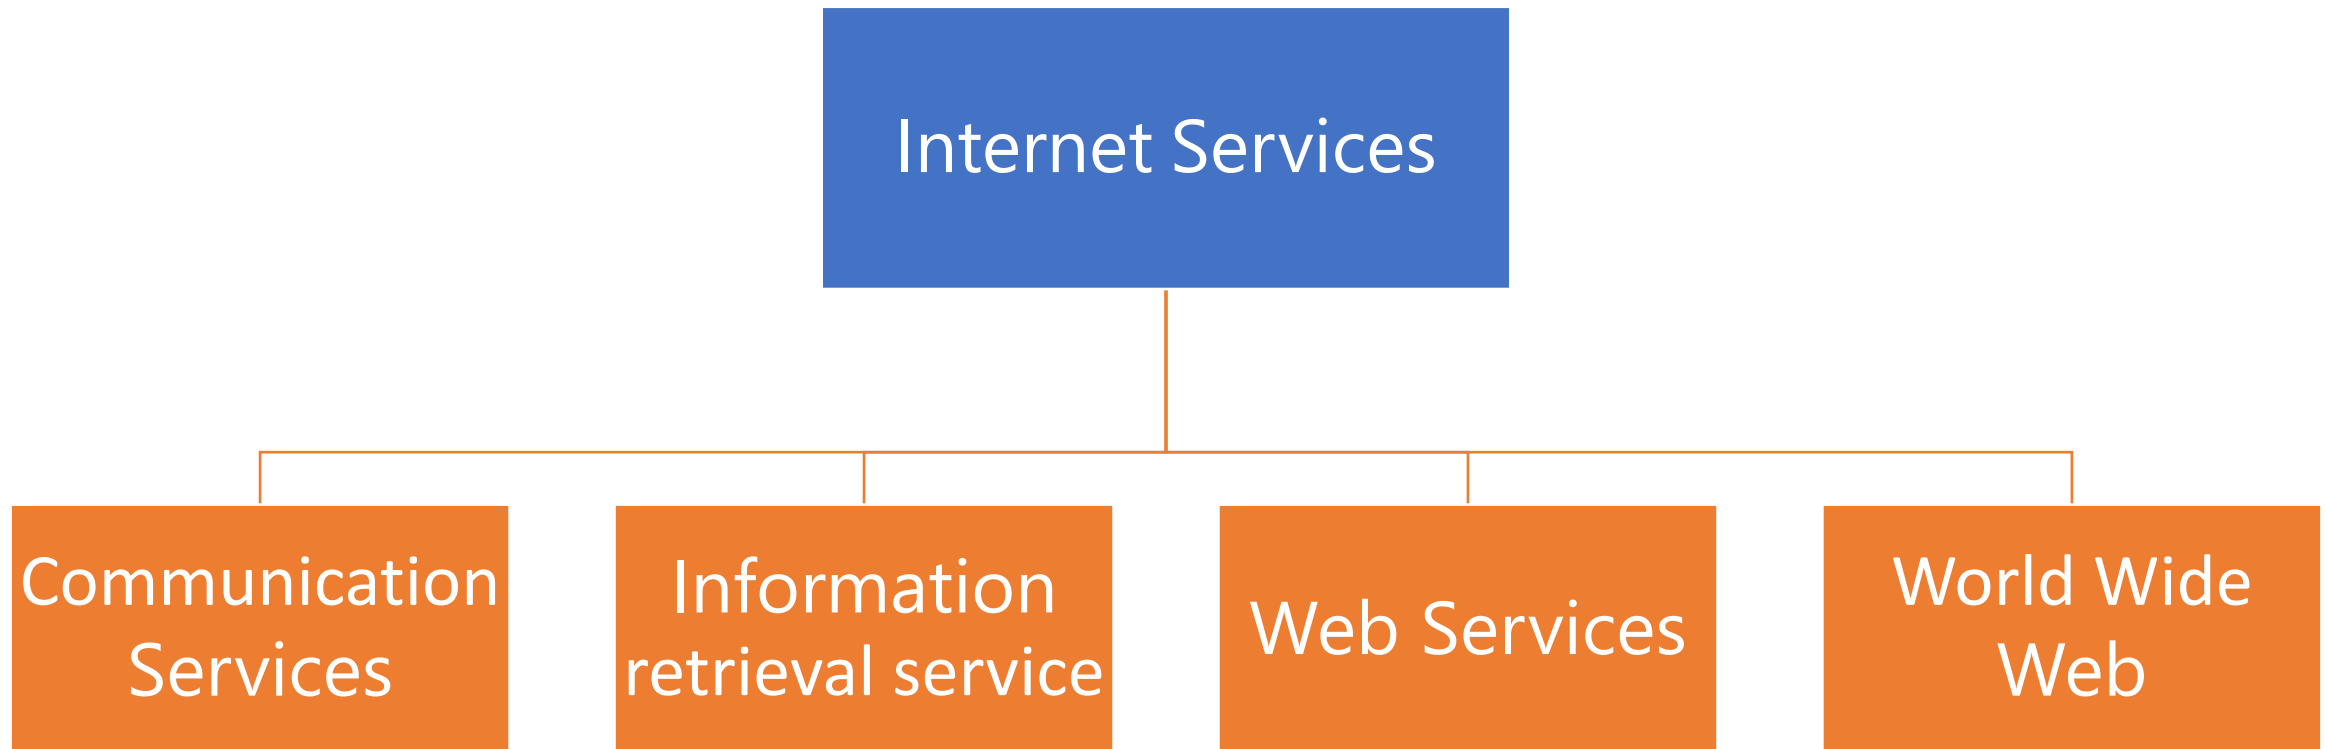

USES OF INTERNET

- Online-business/E-commerce
- Online-library
- Online-interview
- Video Conferencing
- Voicing Ideas And Opinions

USES OF INTERNET

- Getting New Software
- Reading And Watching The Latest News
- Watching Movies
- Sharing Files, Musics, Videos, Programs, Pictures
- Social Networking Sites

IS Categories

COMMUNICATION SERVICES

- Electronic Mail – send e-message
- TelNet – log on to a remote computer
- Newsgroup – forum/discussions
- Internet Relay Chat (IRC) – communicate in real time

COMMUNICATION SERVICES

- Mailing Lists – organize group to share info
- Internet Telephony (VoIP) – talk to any PC to receive call
- Instant Messaging – real time chat
- Video Conferencing

INFORMATION RETRIEVAL

- File Transfer Protocol (FTP) – enables to transfer files
- Archie
- Gopher
- Very Easy Rodent Oriented Netwide Index to Computer Achieved (VERONICA)
- Google
- Yahoo

WEB SERVICES

- allow **exchange of information between applications** on the web
- applications can easily **interact** with each other

THE WORLD WIDE WEB (WWW)

- called as www (wawawa), W3 (W cube) or the Web
- **collection of information** or files publicly available which reside on computers called **Web servers** and are **linked together** through the internet

THE WEB

Key concepts

THE WORLD WIDE WEB (WWW)

- designed by **Tim Berners Lee** in 1990s
- called as www (wawawa), W3 (W cube) or the Web
- **collection of information** or files publicly available which reside on computers called **Web servers** and are **linked together** through the internet

HYPertext MARK-UP LANGUAGE (HTML)

-the **markup language** used by **Tim Berners Lee** in **formatting and linking** the files found on the Web

WEB BROWSER

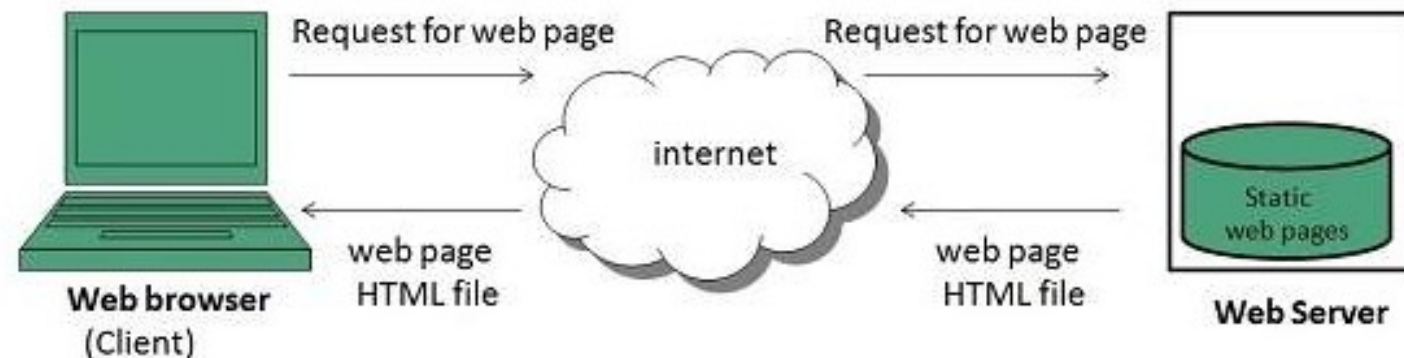

- Apple Safari
- Microsoft Internet Explorer
- Mozilla Firefox
- Google Chrome
- Konqueror
- OmniWeb
- Opera
- Netscape

WEBSITE

- **collection of linked web pages** with a common topic or focus

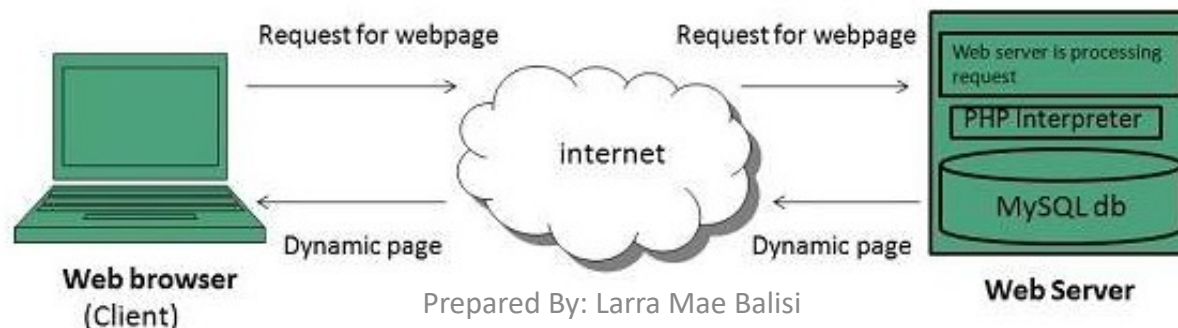

STATIC WEBSITES

- aka **flat** or **stationary websites**
- loaded on the client's browser as exactly they are stored on the web server
- only used when the information is no more required to be modified

DYNAMIC WEBSITES

- shows **different information** at **different point** of time
- possible to **change** a portion of a web page **without loading** the entire web page
- Server-side dynamic web page and Client-side dynamic web page

10 types of Diff Types of Websites

- Business websites
- Brochure and Catalogue websites
- eCommerce Websites
- Non-profit websites
- Educational websites
- Business directory websites
- Portal websites
- Search engines

GENERAL WEBPAGE DEVELOPMENT GUIDELINES

Steps for developing web page

A. PURPOSE OF THE WEB

- very **clear** about **goals** and **objectives**

B. WEB PAGE PLANNING

2 ways

- Internal Planning
- External Planning

INTERNAL PLANNING

- regarding the **content** included in the web page

UI

EXTERNAL PLANNING

- **interaction** between the visitors

UX

C. DESIGNING

- **Components of Web Page:**
 - Text
 - Pictures
 - Animated graphics
 - Audio files
 - Video files

C. DESIGNING

- **Web Authoring Languages**
 - HTML
 - DHTML
 - XHTML
 - XML
 - VRML
 - SMIL
- **Integration of CSS and JS**

C. DESIGNING

- **Steps for Creating Web Page**
 1. Use a text editor
 2. Prepare/digitize other individual components
 3. If the page requires more advanced features(Forms)

C. DESIGNING

- **Steps for Creating Web Page**
 4. Use a **browser** to view the page
 5. **Publish** the page by putting all of its files(HTML files and graphic files) on a web server

C. DESIGNING

- **Steps for Creating Web Page**
 6. View in all **platforms**
 7. **Publicize** the page, get feedback, get new ideas and repeat the steps
